

EMERGENCY & ENVIRONMENTAL SAFETY

Fast, Safe Evacuations
Rapid Usage
Versatility
Clear Instructions
Self Storage

**AlbacMat
 Rescue Mat**

Safe

The AlbacMat has been designed with safety, for both the rescuer & patient, being of paramount importance.

Effective

The ability of the AlbacMat to travel easily over most surfaces - including stairs, carpet & concrete - allows for improved efficiency when evacuating a facility.

Single Person Operation

Evacuations can be performed by one person per patient in most situations which is essential when time is critical.

Use in Any Location

The AlbacMat is totally independent of its environment. It does not matter where the patient may be - in bed, the bathroom or the corridor, they can still be placed onto the AlbacMat & taken to safety.

Ready for Instant Use

Its compact, self storage & lightweight design means it can be readily available in varying locations for instant usage.

Manufacturing

The AlbacMat is constructed from customised materials - including polypropylene board & a lightweight canvas material. These materials have been extensively tested in all types of situations (including flame & heat). The AlbacMat is manufactured to the Australian Standards 2755. The polypropylene board acts as an insulator to the patient & absorbs any concussions incurred while in transit. It also enables the AlbacMat to 'glide' over all types of surfaces. This includes carpet & vinyl, as well as concrete, bitumen & grass, making it simple & easy for rescuers, while being comfortable for the patient.

Design

- > Tapered for patient comfort
- > Easily accessible dual straps for securing the patient
- > Fluorescent yellow straps for detection in dim lighting
- > Foot rest pocket for the comfort & security of patient
- > Simple instructions are clearly visible on the self storage pocket
- > Three separate handles for individual rescuers requirements
- > Insulated board provides patient protection from uncomfortable surfaces
- > Patient can remain on the AlbacMat until the danger has passed & still be treated if required
- > Handles provide excellent control on staircases
- > compact design makes storage easy

Product Range:

AlbacMat Rescue Mat:

- > Ideal for Aged Care/Residential facilities & general public use

AlbacMat with Thermal Cover:

- > Larger design for specific use in emergency services & mining areas, but is also suitable where the AlbacMat Rescue Mat is used
- > Features: Wider design; Carry handles; Extra body strap; Thermal blanket

AlbacMat Holder:

- > Holds 4 AlbacMats (either size) for easy storage & quick access

Background

The AlbacMat has been developed over eighteen months by inventor/designer Allison Backhouse. It was highlighted during a fire training session how difficult it was to evacuate immobile or frail people. After many hours & working various experts including fire and evacuation & Occupational Health and Safety personnel from different fields, the AlbacMat has been fully tested & is highly recommended.
