

CAR PARK & INDUSTRIAL BARRIERS

Column Buffa

- > flexible barrier protection distributes impact forces evenly onto spring steel support posts
- > designed to deflect, reducing pullout forces on anchor bolts
- > absorb energy during impact to reduce risk of damage to barrier, vehicle & structure
- > offers protection from collisions at low speeds with fork-lift trucks or pallet movers
- > protects lighting columns, structural columns & racking supports in car parks, warehouses & logistic depots
- > minimum 500mm internal diameter
- > post height - 610mm
- > rail width - 160mm
- > posts are manufactured from high grade spring steel & heat treated for strength & flexibility
- > available as single, double or triple hoop system
- > available in full or semi-circle units
- > post supports can be turned inwards to prevent a trip hazard or damage to tyres
