FULL RANGE OF OLIVER BOOTS AVAILABLE!

SOLING TECHNOLOGY

At's All Terrain Dual Density PU/ Rubber Soling Technology

The At's Dual Density PU/ Rubber Soling Technology combines a soft shock absorbing low density PU midsole with a high density hard wearing rubber outsole. The long wearing All Terrain rubber outsole is designed for superior grip & durability.

At's Rubber soling technology offers:

- * Heat Resistant Sole. The entire sole is heat resistant to temperatures of 300° Celsius.
- * Chemical Resistant Sole: Resistant to mineral oils, acids, alkalis, animal fats & oils
- * Superior Resistance to cutting & abrasion
- * Antistatic. Discharge anti-static buildup

COMFORT TECHNOLOGY

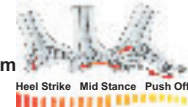

NANOlite Technology

The Oliver Comfort System now has a unique **NANOlite** footbed for greater comfort & well-being. The gently raised surface of the sole massages your feet as you walk, promoting greater blood flow to help reduce fatigue. Plus, a perforated foam air control layer enhances air circulation, reducing odour.

COMFORTcushion Impact Absorption System

Oliver's unique **COMFORTcushion** uses a combination of cellular urethane & **PORON** to protect the heel & ball of the foot, providing superior cushioning & shock absorption at the heel. This constant impact absorption helps reduce foot, leg & lower back fatigue.

NATUREform Type 1 Toe Cap

Oliver **NATUREform** toe caps have a wide profile shaped to suit your foot, & are padded with a latex cushion liner to ensure toes are comfortable & not in contact with the cap. Oliver Boots with **NATUREform** caps are licenced to AS/NZS 2210.3.

2824 Otter Boots

- > water proof
- > oil resistant sole
- > anti-static
- > size 5-13, 6½-10½
