- > elastic side boot
- > winter brown waxy leather
- > sole heat resist to 130°C/266°F
- > sizes 3-16

TRISOLE™ COMFORT TECHNOLOGY

When Steel Blue™ was first launched onto the Australian market in 1995 it quickly set the benchmark for safety footwear comfort and has steadily built on the company's reputation and aim to make the world's most comfortable safety boot. In a short space of time Steel Blue has become one of Australia's most successful safety boot brands and is now available in many countries around the world.

In February 2004 a pair of Steel Blue Argyle safety boots were independently Comfort Index tested and recorded a 'Highly Comfortable' rating and over all Comfort Index of 75. At the time of testing (February 2004) the average Comfort Index score for other brands of safety footwear was only 42.

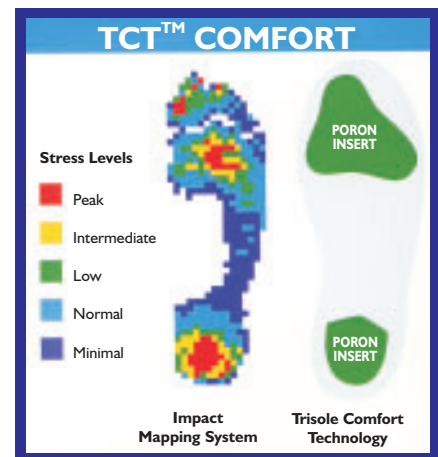

Steel Blue is an innovative pioneering brand, continually evolving and improving. All Steel Blue footwear is made with a special multi density shock absorbing sole called 'Trisole™ Comfort Technology' (TCT™). Strategically placed pads of micro-cellular urethane called PORON is imbedded in the sole under the peak stress areas of the foot to cushion the feet, knees, hips and lower back from normal day to day fatigue.

The diagram to the right shows the pressure points of a normal bare foot on a hard surface. The red areas are the peak stress points and the yellow areas are the intermediate pressure areas. TCT with PORON cleverly cover the areas of the foot that require extra shock absorption. A full length polyurethane footbed called PU-Rebound is placed inside the shoe to offer further cushioning and support to the whole of the foot.

When you wear Steel Blue with TCT you will experience:

- * Significant reduction of shock forces to the feet, knees, hips & lower back.
- * Reduced risk of injury to the feet & lower body.
- * Great comfort.
- * Ongoing protection to aid the recovery of damaged or inflamed joints.
- * Improved flexibility of the sole.
- * Light weight and comfortable safety footwear.

Steel Blue is not just a safety shoe with a steel toe cap to protect toes, it's a complete comfort zone for your feet that will reduce fatigue & promote well being all through the working day.
